

## APPENDIX C

### Seasonal Leaching Fraction and Relative ET Plots

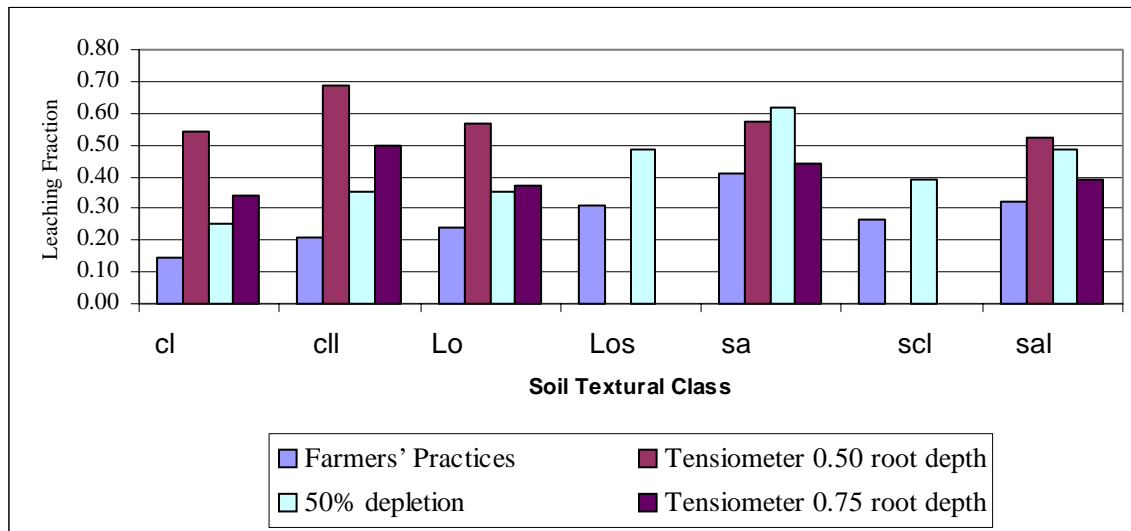

Figure C1. Mean seasonal leaching fraction occurring in each soil type under different irrigation scheduling practices. (Soil Texture Classes: cl=clay, cll=clay loam, Lo=loam, Los=loamy sand, sa=sand, scl=sandy clay, sal=sandy loam)

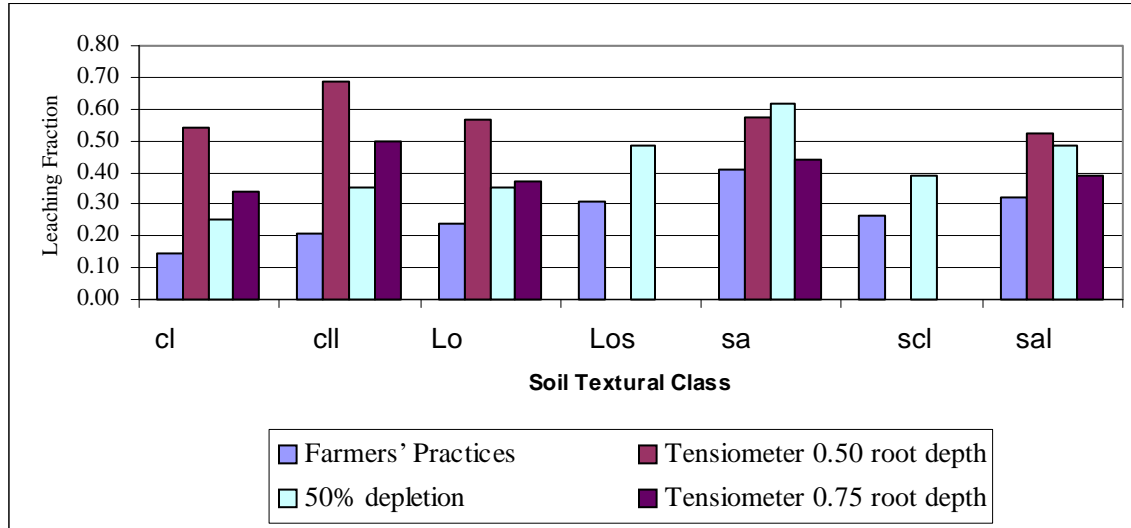

Figure C2. Mean seasonal relative evapotranspiration under different irrigation scheduling practices. (Soil Texture Classes: cl=clay, cll=clay loam, Lo=loam, Los=loamy sand, sa=sand, scl=sandy clay, sal=sandy loam)
