

LIST OF FIGURES

<u>FIGURE</u>	<u>PAGE</u>
1. Study Area Location Map	8
2. Annual Precipitation 1960-1992	7
3. Geology—Doña Ana County, New Mexico	10
4. Depth to Water—Mesilla Valley, New Mexico	see fig4.pdf
5. Net Recharge—Mesilla Valley, New Mexico	see fig5.pdf
6. Aquifer Media—Mesilla Valley, New Mexico	see fig6.pdf
7. Soil Media—Mesilla Valley, New Mexico	see fig7.pdf
8. Topography—Mesilla Valley, New Mexico	see fig8.pdf
9. Impact of Vadose Zone Media—Mesilla Valley, New Mexico	see fig9.pdf
10. Hydraulic Conductivity—Mesilla Valley, New Mexico	see fig10.pdf
11. Maximum Bladex concentrations at 180-cm soil depth under farmers' management practices	39
12. Relative maximum Bladex concentrations at 180-cm soil depth under the farmers' management practices: mean value for each soil type	39
13. Maximum Dual concentrations at 180-cm soil depth under the farmers' management practices	40
14. Relative maximum Dual concentrations at 180-cm soil depth under the farmers' management practices: mean value for each soil type	40
15. Relative maximum Bladex and Dual concentrations at 180-cm soil depth under the farmers' management practices: mean value for each soil type	41

LIST OF PLATES

<u>PLATE</u>	<u>PAGE</u>
1. Natural Sensitivity of Ground-Water Aquifers - Mesilla Valley New Mexico	see plate.pdf

LIST OF TABLES

<u>TABLE</u>	<u>PAGE</u>
1. Depth-to-water table parameter rating (D_r), weight (D_w), and index (D)	16
2. Net recharge parameter rating (R_r), weight (R_w), and index (R)	17
3. Aquifer media parameter rating (A_r), weight (A_w) and index (A)	18
4. Soil media parameter rating (S_r), weight (S_w) and index (S)	18
5. Topography parameter rating (T_r), weight (T_w), and index (T)	19
6. Vadose zone media parameter rating (I_r), weight (I_w) and index (I)	19
7. Hydraulic conductivity of the aquifer parameter rating (C_r), weight (C_w), and index (C)	20
8. Assigned weights for combining DRASTIC parameters	20
9. Comparison of different methods for determining field capacity and permanent wilting point values	29
10. Average farmers' planting date	33
11. Maximum, minimum, and base temperatures for alfalfa, chile, corn, cotton, and onions growth	33

LIST OF TABLES, continued

<u>TABLE</u>	<u>PAGE</u>
12. Areal extent of depth-to-water table by interval, Mesilla Valley	34
13. Areal extent of net recharge areas, Mesilla Valley	34
14. Areal extent of aquifer media classification, Mesilla Valley	35
15. Areal extent of soil media classification, Mesilla Valley	35
16. Areal extent of the topography for the Mesilla Valley	35
17. Areal extent of the vadose zone media, Mesilla Valley	36
18. Areal extent of the hydraulic conductivity classes in the Mesilla Valley	36
19. Areal extent of the natural sensitivity classes in the Mesilla Valley	37
20. Mean maximum Bladex concentrations at 180-cm soil depth resulting from tensiometer-based irrigation scheduling	54
21. Mean maximum Dual concentrations at 180-cm soil depth resulting from tensiometer-based irrigation scheduling	54
22. Mean relative maximum Bladex and Dual concentrations under different management practices	55
