

Future Direction of Federal Water Policy

Jeff Riley, Bureau of Reclamation, Phoenix Area Office

Jeff Riley, P.E., is the manager of the Engineering Division at the Bureau of Reclamation's Phoenix office. His work with water resources has included dams, canals, pipelines, irrigation facilities, and other civil works. He has been involved throughout the New Mexico Gila River Arizona Water Settlement Act decision process, providing engineering studies and analyses. Jeff attended Colorado State University and received a BS in civil engineering. He is a registered professional engineer in the State of Arizona.

Editor's Note: The speaker did not have a PowerPoint presentation to accompany his remarks, and a transcription of his talk is not available.
