

NM WAIDS

A water quality database for New Mexico

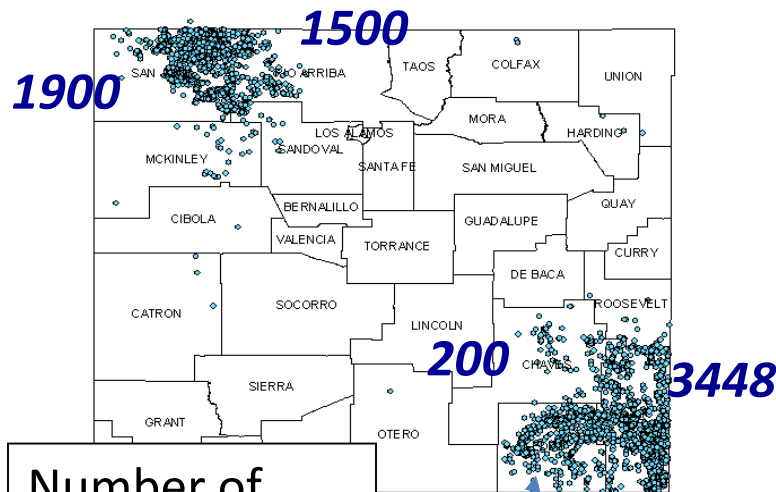

Primary objectives of original project:

- Assemble database of produced water info: chemistry, volumes, injection volumes, locations.
- Create a web-based interface to this data

Primary objectives of current project:

- Upgrade web interface using more current web technologies
- Analyze existing data for missing areas or plays
- Collect additional data, focusing on data gaps

NM WAIDS Produced Water Database – Current Version

Number of produced water samples by county.

Produced water chloride content, Southeastern New Mexico.
