

# Dynamic Water Budget Current Functionality

- Visualize major stocks and flows of water through New Mexico at the state level, or by major river basins for a user specified period of time.
- Currently, only historic period is available for visualization.

# Year Two (2015-2016) Objectives:

- Addition of Water Planning Region and County spatial scales
- Quantification and display of uncertainty
- Water energy nexus information
- Graphic User Interface enhancements
- Future base case scenario analysis
- Outreach and support
