

Jack Veenhuis is currently project chief of the NPDES Stormwater Sampling Program with the New Mexico District Office of the U.S. Geological Survey. The stormwater sampling program is a cooperative project jointly funded by the City of Albuquerque, the Albuquerque Metropolitan Arroyo and Flood Control Authority, and the State of New Mexico Highway Department as a part of the stormwater discharge permitting process for the Environmental Protection Agency. Jack has been involved in urban runoff studies for 16 years with the USGS in Denver, Austin, Ft. Worth and Dallas. His undergraduate degree was from Michigan State University with graduate studies completed at Colorado State University.

WATER QUALITY OF STORMWATER INFLOWS TO THE RIO GRANDE
